Telemedicine

Not only does telemedicine save you travel time and let you avoid crowded waiting rooms, but it also saves you significantly on healthcare costs.

Visit your member portal to view your telemedicine provider.

QUICK LINKS

Evidence also shows that telemedicine has led to the early detection of potentially life-threatening diseases that patients would have otherwise ignored.

Preventive Care

Preventive services are covered at 100%. A preventive service is either a test or treatment that your doctor provides to prevent symptoms before problems arise. This includes annual wellness checkups, screenings, immunizations, etc.

We follow the health benefits and coverage outlined by USPSTF.org and follow guidelines set forth by the Affordable Care Act (ACA).

Adults

Preventive care for adults includes colorectal cancer screenings, immunization vaccines, and more.

Women

Preventive care for women includes mammograms, diabetes screenings, wellness visits, etc.

Children

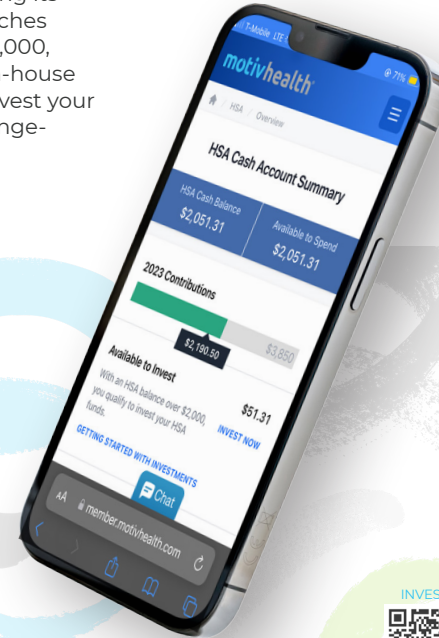

Preventive care for children includes immunization vaccines, vision screenings, and more.

HSAs & Investments

Health Savings Accounts (HSAs) are the most effective way to save for healthcare costs. They offer a triple-tax-advantage: tax-free contributions, growth, and withdrawals for qualified medical expenses. In fact, HSAs can make your high-deductible health plan feel like a “no-deductible” health plan.

Tax-Free Growth

Take advantage of your HSA's tax-free growth by investing its funds. Once your HSA reaches a minimum balance of \$2,000, you can use our unique in-house investment platform to invest your HSA in mutual and exchange-traded funds.
